

SHARK II VENTILATION CHAINSAW

BATSHARK

SHARK II

SHARK III

SHARK CC

 Husqvarna

Carbide Tipped Rescue Chain

Specifically designed for Fire Department use, outlasts up to 10 regular chains and stays sharp up to 25 times longer.

Durable Reversible Steel Bar

You have 3 choices to choose from: 16" 54 Drive link Bar, a 20" 64 Drive link Bar for our legacy SHARK owners (this model is the same as our pre 2020 SHARK saws) or our NEW 20" 66 Drive Link Bar. This new 20" 66 Drive Link Bar is the same size as other brand saws making it easy for spare parts management. With this new 20" 66 DL Bar, our SHARK saw will use the same size chain as other brands. All SHARK bars are slotted to fit our CDA-80 depth adjuster and are reversible hardened steel bars for extended life.

CDA-80 Adjustable Depth Adjuster

Control cutting depth from 2" to 10" when plunge cutting. Easy, fast removal when full length of bar is needed.

Adjustable Flow Oil Pump

Keeps chain properly lubricated in diverse conditions with no oil flow at idle.

NEW X-Torq® Engine

Provides peak performance even under heavy loads with 12% higher cutting capacity all while delivering lower fuel consumption and reduced exhaust emission levels.

AutoTune

No time spent on carburetor adjustments as the AutoTune Carburetor compensates for different fuels, altitude, humidity, temperature and clogged air filter automatically providing optimal engine performance.

State-of-the-art filtration system

Air Injection filters out 98% of incoming dust prior to reaching the heavy-duty air filter for longer life and better filtration.

Flip up tank caps

Easy to open and secure firmly, even when wearing thick winter gloves.

Visible fuel level

Easy to check fuel level with transparent fuel indicator.
